

I am subscribed to 2 kinds of satellite services, #1 is Dish network #2 is Xm radio. I strongly support satellite broadcast. the fcc has taken away Our rights to have an all america one nation local channel broadcast networks through Echostar & Direct tv & now they are doing the same for Xm satellite radio? I live in a state that has limited tv & radio stations, & what I can catch in the air waves is garbage. I want quality broadcast stations. freedom & democracy in America is a thing of the past.
